Goals for this session

Data
Modelling
Part 2

1 Disconnected Tables

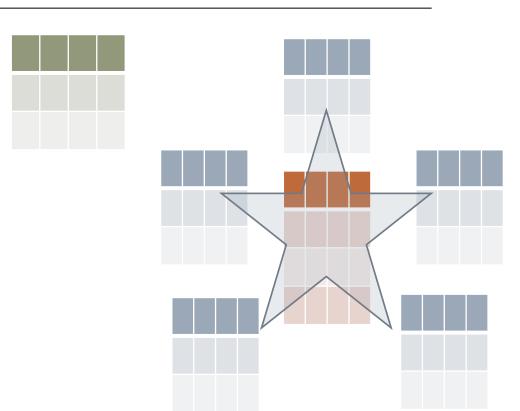

2 Snowflake

3 Junk Dimensions

4 Q&A

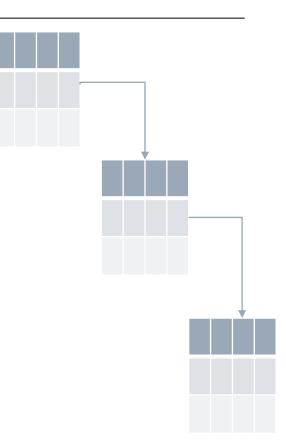

Part 1: Disconnected Tables

- A disconnected table is not joined to the star schema
- Even through this table is disconnected, we can make use of it through the power of DAX

Part 2: Snowflake

- Set of normalized tables for a single business entity
- Generally, avoid and combine within a single table

Part 3: Junk Dimension

- Consolidate many "small" dimensions into a single dimension
- Cartesian product of all dimension attribute members
